- Personal safety equipment
- Border Guard Systems
- Products for the military and law enforcement agencies
- Communication facilities and their components
- Green technology, environmental protection and disposal

Systems and means of fire safety:

- Fire alarm systems
- Fire extinguishing systems and means
- Fire retardant materials and structures
- Equipment and accessories
- Fire fighting equipment and special units

Rescue equipment:

- Machinery, technology, equipment for the prevention of accidents, disasters and liquidation of their consequences
- Personal protective equipment, first aid equipment
- Outfit and equipment of firefighters and rescuers
- Rescue devices
- Mining equipment and gear
- Personal respiratory protection
- Life support equipment
- Special machinery

OCCUPATIONAL SAFETY

Production and realization of individual protection equipment:

- Special clothing
- Special shoes
- Protective equipment for head, face, eyes, hands, respiratory and hearing safety belts
- Collective protection
- Measuring and control instruments

- Safety equipment and technology
- Technical and fire safety
- Sanitary service
- Research and development on labour protection
- Occupational medicine. Occupational hygiene
- Rehabilitation means

IT SECURITY

The protection of information. Bank equipment:

- Identification technologies: RFID, biometrics
- Authentication technologies
- Production, personalization and engineering maps
- ATMs, terminals, readers

- Bank equipment
- Technical means of information protection
- Information technology and security
- Software
